

Community Connections Program

Support • Connect • Community •

This program supports people to connect to their community, social networks and services.

Having strong connections can improve your wellbeing and provide long-term benefits.

How Community Connections works

Community Connections Program Partners across South Australia work with you to develop goals and provide short-term support or connect you with longer-term support if needed.

The goals you develop could have a social or wellness focus. You can build confidence by taking part in local community activities, take up a new or once loved hobby, find a support group or be referred to services.

The Community Connections Program experience is about you, developed with you.

Explore some of our participant stories to see how **Community Connections** has changed people's lives.

Embracing diversity together

Our program respects and values the unique perspectives, traditions and languages that enrich our communities.

Who Community Connections is for

- People who live in South Australia.
- Are aged 18 to 64.
- Need support to strengthen connections with their community, social networks and services.
- Are ineligible for the National Disability Insurance Scheme (NDIS) and My Aged Care.
